## PROFILE

Digital Design & Development student combining interaction design, visual design, and creative coding. I design and build interactive websites, mobile apps, and real-time 3D experiences, and currently lead UX for a team-based interactive installation. Seeking an internship exploring UX, creative technology, and connections between digital and physical spaces.

## EDUCATION

**Howest University of Applied Sciences — Belgium** **2023 – Nov 2027 (expected)**
*B.Sc. Digital Design & Development (Devine) · Major: Creative Development · Minor: Experience Design*

## SELECTED PROJECTS

**Firefly Forest — Transfo Intiem 2026** *Ongoing*
*Bachelor Thesis · Interactive Installation · UX Lead*
- Leading user research and interaction design in a team of three for an immersive installation at Transfo Intiem 2026.
- Developing a breath-inspired experience with touch-responsive, glowing flowers and a projected forest of fireflies.

**Marina Yee — One Corner Off** *Live site*
*Solo project · Interaction Design · Visual Design · Creative Development | JavaScript, GSAP, CSS*
- Researched, designed, and developed an interactive editorial website for a university project for MoMu Antwerp, translating Marina Yee's approach to garment reconstruction into typography, layout, and interaction.
- Created scroll-driven storytelling, draggable elements, and a custom paper-fold interaction, with keyboard controls, reduced-motion support, and responsive layouts.

**Study Room** *Live site*
*Solo project · Interactive 3D · Creative Development | Blender, Three.js, TypeScript, WebGPU*
- Modelled and developed an interactive 3D environment that responds to local time and weather, combining dynamic lighting, animated objects, shaders, and physics.
- Connected pointer input to rain effects and object interactions; added drawing tools and audio-reactive animation to encourage exploration.

**Miles & Meals**
*Solo project · Brand Identity · App Design · Prototyping | Figma*
- Developed a visual identity and app concept for a street-food meal-box service, combining editorial art direction with structured, functional interfaces.
- Designed app flows for choosing boxes, tracking delivery, exploring food destinations, and following recipes, supported by a Figma prototype.

**Mongmo** *GitHub*
*Solo project · Mobile Development · Location-Based Interaction | React Native, Expo, TypeScript, Supabase*
- Built a cross-platform app connecting pop-up discovery, ordering, and rewards through geofencing, QR/GPS check-ins, and interactive challenges.
- Integrated camera, motion sensors, and notifications, with server-side validation for orders, check-ins, and points.

## EXPERIENCE

**Digital Consultant & Web Developer — Biozone** **July 2025 – January 2026**
- Reorganised a 20+ page scientific website into a clearer content and navigation structure.
- Rebuilt the website on Odoo, connected it to the company database, and advised leadership on digital and technical decisions.

**Freelance Web Developer & Designer** · *Belgium / Remote* **2018 – Present**
- Designed and developed websites and digital solutions for small businesses, managing projects from requirements gathering through deployment.
- Implemented Shopify and Odoo storefronts, website migrations, and business integrations.
